Re: Ditch Bank Screed roller

Dear Tom,

The Ditch bank screed roller worked out great. After your training session we moved forward with no problems and production in excess of 200 cyd per day the third day using the machine.

The machine was easy to use and left an excellent finish. I especially appreciated your willingness to part with hard-earned knowledge and give away tricks you have learned to make the process work.

Your after sale follow up was better than any equipment company I have ever dealt with.

We were able to pay for the machine on the first job.

Thanks for the help.
